RAJAMOHAN REDDY V

SOFTWARE ENGINEER (AI) | DATA ANNOTATION & ML OPERATIONS | PYTHON & SQL

Hyderabad, Telangana | +91 9705639720 | rajamohanreddy623@gmail.com | linkedin.com/in/rajamohan-reddy-v

PROFESSIONAL SUMMARY

Software engineer (B.E. Computer Science, CGPA 8.86) with hands-on experience in image/video annotation, dataset preparation, and object detection testing. Strong Python and SQL skills for data cleaning, validation, and analysis, plus web application and API development with Flask, FastAPI, and Streamlit. Detail-oriented in quality review and defect reporting; works with developers in Agile teams.

SKILLS

Annotation & ML Operations: Image/Video Annotation, Dataset Preparation, Computer Vision Data Preparation, Object Detection Testing, Edge-Case Testing, Data Quality Validation

Programming & Data: Python, SQL, Pandas, NumPy, Scikit-learn, NLP, Data Cleaning & Validation

Web & Dashboards: Streamlit, Flask, FastAPI, REST APIs, Web Application Development

Generative AI & Tools: LLM Applications, RAG, LangChain, Hugging Face, FAISS, ChromaDB, Git/GitHub, Jira, Google Colab

EXPERIENCE

Associate Software Engineer (AI) | **CloudHub (Netherlands)** *Apr 2026 – Present | Remote*

- Annotate image and video data and prepare datasets for computer vision projects, including object detection testing for Cattle Health Monitoring.
- Review annotated data and model outputs, identify edge cases, and iterate on workflows to improve consistency.
- Build and test Generative AI and LLM-powered applications and chatbots for real-world use cases.
- Analyze model capabilities and limitations when designing AI workflows and application behavior.

AI Freelancer | **Self-employed** *Jul 2025 – Mar 2026 | Remote*

- Built RAG-based chatbots with Streamlit web interfaces using LLMs, LangChain, Hugging Face, and FAISS/ChromaDB.
- Experimented with prompts and workflow approaches, evaluated AI-generated outputs, and refined solutions based on results.
- Built AI prototypes and proof-of-concept solutions from real requirements; explored AI automation to reduce repetitive tasks.

Marketing Intern (Part-time) | **Curolynk** *May 2026 – Jul 2026 | Remote*

- Researched medical topics, competitors, market trends, and customer requirements to support clear, informed content.
- Used AI-based tools to improve content and marketing workflows; supported lead generation and outreach.

Software Engineer (Intern) | **Prismire Software Solutions** *Feb 2025 – Jun 2025 | Hyderabad*

- Validated digital content across HTML, CSS, and XML, identifying inconsistencies and edge cases.
- Ran repeatable tests on document-conversion workflows and reported defects using Git and Jira.
- Verified content structure, metadata, and file quality with strong attention to detail.

AI Trainee | **Fulcrum Digital** *Apr 2024 – Oct 2024 | Remote*

- Built and tested NLP model APIs, validating inputs and outputs and identifying unexpected model behavior.
- Investigated edge cases and inconsistencies in AI/NLP outputs; used Python, Pandas, and NumPy for data cleaning and validation.
- Annotated and prepared data for AI and computer vision projects; collaborated with developers in Agile workflows.

PROJECTS

HistoriGuide – Navigating India's History with Ease

- Developed a GPS-based interactive web application for historical learning.
- Performed functional and exploratory testing, identifying edge cases across different network conditions.
- Investigated unexpected behavior and improved reliability through iterative testing.

E-Waste Management System

- Built a full-stack platform for scheduling e-waste pickups, tracking recycling status, and locating certified disposal centers.
- Tested end-to-end workflows and identified defects in status transitions and API response handling.

EDUCATION & ACHIEVEMENTS

B.E. Computer Science | R.M.D Engineering College *2020 – 2024 | CGPA: 8.86*

Intermediate (MPC) | Amaravati IIT Academy *2018 – 2020 | CGPA: 9.25*

- Team Awesome Award (2024) at Fulcrum Digital for outstanding team contribution and collaboration.
